Web Developer

2017 - 2018

@ Computer Xperts&eShop Designers, Sialkot Pakistan
<https://www.eshopdesigners.com>
<https://xperts.net.pk>

Eshop Designers is a UK based web development company having sub offices in Pakistan too, here I worked as a senior web developer, I worked on following technologies:

- Core PHP, Wordpress, MVC (**Laravel and Codeigniter**)
- JavaScript, jQuery, NodeJS
- PHP libraries (TCPDF, Ion Authetic)
- JQuery Plugins (Full Calendar, DataTable, Charts, SummerNotes, Sweet Alerts, Toasters, JQuery Form Validations etc)
- HTML/CSS, Bootstrap, Inspinia and Admin LTE Admin Themes etc
- MySQL, NoSQL (MongoDB)

And I also helped in planning the projects, software architecture, and the training of new employees/interns was also included in my responsibilities.

IT Manager

2016 - 2017

@ Qaiser Group of Electronics, Sialkot Pakistan
<http://qaiserelectronics.net>

This organization is one of the top electronics resellers in Pakistan. It has multiple branches/showrooms in different cities of Pakistan. Only in Sialkot city, it has up to 17 to 20 branches/showrooms in different locations.

Here is a brief description of what I did for Qaiser Group of Electronics with some of my key responsibilities:

- Responsible for the safety and maintenance of all the computer hardware/software and internet in all the 17 branches across the city including head office
- Check and balance of all computer operators working in all of the branches
- Computer/software training of new employees
- Data protection and backups

Network Administrator

2013 - date

@ Nexus Tech, Pakistan
<https://web.facebook.com/nexustechpk>

In my living area, there was no internet facility. At that time I started providing wireless internet to home users in my town. Now, up to 150 users are in my network.

In that network, I used following technologies:

- Mikrotik Server for Hotspot and managing users
- UBNT outdoor wireless access points
- TPlink routers and load balancers
- HFS file server

IT Manager

@ Career Services

<http://careersv.com>

2010 - 2012

Career Services was the best student/visa consultancy firm. As an IT manager, my responsibilities were as under:

- Responsible for the safety and maintenance of all computer hardware/software and internet in the office
- Computer/software training of new employees
- Data protection and backups

Mohammad Sadiq

Nationality

Pakistani

Marital Status

Married

Religion

Islam

Date of Birth

01 January, 1991

Passport No

MP6892783

Hobbies & Interests

I love gardening and playing computer games.

Portfolio

Some of the projects that I have done are:

USHRE

<https://ushre.com>

I worked on this website which is based on Perch CMS. This PHP based CMS was light weight and highly customizable. It helped me to create a Property related website quickly. This website was also connected to Propertyfinder.com to fetch property listings and display on the website.

Kindus Perfumes

<https://kindus.ae>

I converted this Static website into an Ecommerce website using OpenCart. My favorite feature in this project is, website theme's color changes according to the Perfume bottle's color.

WhatsApp Messaging API

<https://onyxberry.com/services/wapi>

I developed this project to send messages, notifications, OTP codes etc from website/app to WhatsApp. By integrating this API user can send messages to the Customers on their WhatsApp.

I used following technologies in this project:

- Python and Selenium Library
- Codeigniter, JQuery, MySQL

Barcode Label Generator for Noon

<https://onyxberry.com/services/barcode>

When Noon.com restricted the sellers to place barcode label on their products, it was required for them to buy a separate Label Printer that was an expensive solution for small sellers.

The aim of this project was to minimize the seller's cost by offering an alternative solution. By using this, a seller can generate and print barcode labels on a normal/existing standard A4 printers.

MOCAUAE.AE

<https://mocauae.ae>

This website was a part of the Odoo Implementation Project within the company. I designed and made this ecommerce website compatible with the existing internal company workflow.

In this project, Odoo 10 was used as ERP and website with other existing web development tools.

UNICHIP.AE

<https://unichip.ae>

This Ecommerce website was developed with Core PHP with minimum features to keep it light weight and fast.

Dubizzle.com Phone Number Extractor

<https://www.youtube.com/watch?v=OEgo3NkZNmc>
